"Made in Canada" is worth looking for: it means 60,000 New Jobs in Ontario

Look for the label the next time you buy a newspaper — it could be a job at gold!

Every day, Canadians buy over 510,000,000 worth of newspapers — making readers, subscribers, adult applicants and so on. There are not 500,000 jobs in the newspaper industry. There are not 500,000 jobs in the newspaper industry. There are not 500,000 jobs in the newspaper industry.

Consistent improvement in quality design and performance have established its valuable commitment to Canadian business. From every standpoint, they are not only approved by business but also and should. Of course the first buying decision is yours — but remember

every time you buy an article that has been made in this country you help Canadian industry to grow and prosper. In this way you help to create the 60,000 new jobs necessary for the young men and women who join Ontario's work force tomorrow.

When you're shopping for household or any product, look for the "Made in Canada" label. When you find what you want — and the price and quality are right — make your investment in job security and better living!

CGE turns your pots and pans into automatic appliances

A control device, mounted in the bull's-eye of a surface unit of this electric range, senses the temperature changes that occur at the base of a cooking pot. It makes automatic adjustments to maintain the heat level you

originally selected. Result: greater cooking convenience. At Canadian General Electric, close attention to detail is part of what we call engineered quality. And it places the accent on value whenever, wherever you buy CGE.

Paper brings him knowledge...and something else

**Did you know that each day the operations of 41 Canadian pulp and paper mills add five million dollars to the nation's wealth? The other facts about the industry are set for the booklet "About Pulp and Paper" available from the Canadian Pulp and Paper Association. Box 140, Montreal, Quebec.*

Pulp and paper is Canada's leading manufacturing industry. So, while its products enrich our lives in many ways, its operations help to provide a healthy and prosperous economic climate in which young Canadians can flourish.*

The growth of the pulp and paper industry has been both steady and substantial. It is the largest single contributor to the national income. Its prosperity brings daily benefits to all Canadians, of all ages.

HOW COME ONLY OUR DISTILLERY IS LOCATED IN ALBERTA? BECAUSE THAT'S WHERE FINE CANADIAN RYE GRAINS GROW.

That's what you need to make fine Canadian rye whisky!

Traditionally, fine Canadian Whisky is made from rye grain. Although it is true that other grains can be used to make Canadian Whisky, we at Alberta Distillers still make ours in the traditional way using rye.

Outside the city of Calgary, Alberta, stretching outwards as far as the eye can see, an ocean of grain runs high above the Canadian Prairie. Some of this is the finest rye grain grown in Canada or, for that matter, the world. Alberta farmers plant it in early September, harvest the following summer. Then, in the Arctic cold and swirling, October winds under the rye with constant bluish, velvet drizzle.

A good many of these rye seeds are harvested within a few hours' track drive from our distillery on the edge of the prairie in Calgary. Once harvested — Tatum, Duval, Esquipto — to name a few — are delivered fresh from the fields where they grow. Over the years it has become something of a tradition with Alberta Distillers to buy this rye from the same farmers season after season, until now there are customers whom we are dealing with a second generation.

And that's why our distillery is located where it is. Right in the heart of the rye grain country. While we are so far from being Canada's largest distiller we are Canada's largest single user of rye grain. So it makes good sense for us to be where we are.

There are a couple more things too. First, distilling needs plenty of good water and here in Alberta, our water comes in an underground torrent — fresh, cold, glacier born — from the Rocky Mountains on the horizon to the West. Then there's the air. Whisky takes much of its colour and bouquet from being aged in specially charred white oak barrels and perfect dry mountain air outside these barrels comes almost to fall at the liquid inside capturing the aging process making mountain born whisky smooth and soft to the taste.

From this combination of air, water and world famous rye grain comes the Canadian Whisky you are aware with pride. Now then you are about to buy, mix for us, Alberta Distillers' brand. Congratulations for choosing. There just isn't any better Canadian whisky.

GOOD RUMS MUST BE IMPORTED

Rum is made in one major state: liquor state does not grow in Canada. Like imported Scotch, imported rum is the real thing. Lunan Rum Rum is imported. It's made directly on the bottle. It is made from sugar cane juice in one place. Lunan Rum Rum, for example, is actually distilled in the both regions of the Canadian River. It is shipped to England for port aging, then to the Lunan docks (the blue color comes from the sugar cane liquor). There it is bottled and shipped to Canada, now it is the first distillery and completely imported. Rum, if you feel your spirit down, the first thing is... Lunan Rum Rum imported. Decorating with Fiberglas

Some people find it hard to believe that glass can be transformed into beautiful, soft, continuous fibers. But it can be, and Fiberglas® does it. One result is the lasting luxury of draperies made of Fiberglas, in a wide range of colors and patterns for the home. Fiberglas draperies never crease, need ironing, can even wash and dry. They always hold their shape and they are particularly fire resistant. Small wonder that so many people ask for products made of Fiberglas, the modern material that contributes in so many ways to modern homes, houses and industry.

How John A. conjured up Canada

His implausible triumphs and celebrated weaknesses are with us yet—every Canadian prime minister governs by the legacy Macdonald left. This recreation of his supreme hour is taken from a new book, Mr. Prime Minister, by Bruce Hutchison

On the evening of July 1, 1867, John Alexander Macdonald, an exceptionally capable but somewhat dim-witted man, was told that the Canadian Confederation was formally born. Even if the question of its birth had been composed of a single link, instead of the hundred thousand and a half, stretching across the Queen's Commonwealth.

Prime Minister Lord Monck, accepted without real mystery, with British privilege. He was evidently based by the colour of his hair and did not take the pressure too seriously. He was sitting in a room, looking at a map of the new country, when he suddenly had a vision of a great future and a great future.

At that time, the Prime Minister of the United Kingdom, Lord Monck, was sitting in a room, looking at a map of the new country, when he suddenly had a vision of a great future and a great future.

The "march of Confederation" was a book that was the first publication of a new series.

The Good Guys

Donald Gordon, now CNR President and hero name of Quebec nationalists, is probably the most improbable comic book hero of all time. But as a case of the wartime economy, he was right up there with the Invisible Centennials and Johnny Canuck.

Twenty YEARS AGO when schoolbooks still listed his name as a traitor, Gordon was one of the most famous Canadians in the world. He was the first Canadian to be named "Man of the Year" by Time magazine in 1941. He was also the first Canadian to be named "Man of the Year" by the Canadian public in 1941.

Most of the Good Guys were Gordon. They were in a constant line of battle against Hitler. They were in a constant line of battle against Hitler. They were in a constant line of battle against Hitler.

The other Good Guys were Gordon. They were in a constant line of battle against Hitler. They were in a constant line of battle against Hitler. They were in a constant line of battle against Hitler.

All in all, Canadian youth was surprised that the name and the name was a real one. They were in a constant line of battle against Hitler. They were in a constant line of battle against Hitler. They were in a constant line of battle against Hitler.

There also had their position. But this was not the case. They were in a constant line of battle against Hitler. They were in a constant line of battle against Hitler. They were in a constant line of battle against Hitler.

At the monastery, however, as the monks walked toward the palace, they were met by a group of soldiers and ordered to stop. The monks were asked to hold the temples of the common leader and through this respect invited to one side of the story. They had defected his order. Foreign monks are welcome in the country, but people are deeply afraid of the monks. They request the country, Hyderabad and the leaders of the Chinese people. They will all the means have proved. The Checkeris family of Sudbury are glad they chose electric heating

**"We wouldn't dream of going back to any other system.
Electric heating is very economical. It's much
cleaner and there's a lot less dust."**

Mr. and Mrs. Ernest Checkeris and their three children live in a nine-room home in Sudbury, Ontario. They heat 2,200 square foot on four levels. Mr. Checkeris is particularly impressed with the dependability of electric heating because his activities in community affairs as President of the Ontario Jaycees, Chairman of the Public School Board and President-elect of the Sudbury and District Citizenship Council keep him away from home a lot. What Mr. and Mrs. Checkeris have to say about the many advantages they are enjoying with electric heating will interest everyone who plans to buy or build a new home.

**"I JUST WOULDN'T HAVE ANY-
THING ELSE,"** smiles Mrs. Checkeris.
"We can have such meals at the tem-
peratures we wish. The children like it
because they can set the thermostat
to their own bedrooms. It's nice over
here and it's reasonable."

"WE FIND IT VERY ECONOMICAL to heat
electronically," Mrs. Checkeris points out. "January
was a real month, with high winds, yet our total
Hydro bill was less than 100 including heating,
cooling, the water heater and everything."

**"MY NEIGHBOURS SAY
IT SMELLS SO CLEAN!"**
says Mrs. Checkeris.
"They come in and say
your house smells different.
It doesn't smell dirty.
They figure that it's the
electric heating."

"IT MAKES A LOT LESS WORK. There's no
dust floating around. With the heating system
we had before I could dust twice a day. Now I
only dust the door and forget it all week."

**"WE FIND THE
WARMTH IS SO
MUCH BETTER
with our electric
heating." We don't
have the dry throat
at night that we used
to have. Perhaps
that is one reason
why the children
haven't had nearly
so many colds."**

Electric heating is one of the many smartest investments of the future.

heating contractor in your Hydro.

There are at least 11 good reasons for insuring your car, home, or business through a man like this

Will you get these benefits if you buy insurance directly from some companies?

Because an independent insurance agent represents not one but several insurance companies, he is able to do the following:

1. He **selects the right policies for you.** Few companies offer all types of insurance. It is a salesman for a single insurance company likely to tell you about policies his company does not offer.
2. He **gives you important advice.** How can a salesman for a single insurance company be impartial?
3. He **helps you with the details of your claim** when you have a loss. If you buy insurance from a company salesman, you may never see him

again. You will have to deal with an insurance company—alone.

4. He **represents companies which offer the best rates for you and of course.** An independent agent, who represents many companies, is able to get the best rates for you and of course.
5. He **gives you continuous, personal service.**
6. He **represents only strong, reliable companies.**
7. He is **able to save developments.**
8. He **knows local conditions.**

9. He is **professionally trained.**
10. He is **available day and night.**

So, you can get help anywhere from any of the more than 100,000 companies throughout North America.

Just look for the Big "I" symbol on his window or door—or in the classified section of the telephone book.

He makes no charge for these services. The Big Difference in insurance is the difference in independent insurance agent.

FOR THE SAKE OF ARGUMENT

WILLIAM S. KATZMAN SEPTEMBER 17, 1981

**FRANK KELLEY says:
Britain exploited us—
so let's stop saluting
the Union Jack**

THE CANCER THAT PLAGUED contemporary pain as the first I can hear the distant groans of the British folk songs. Many of Britain's composers used these folk songs of Britain to write the musical scores that had captured them for us long. But here — as in other famous instances that still harbor a great many descendants of Britain — there is a darker and deeper connection. For English businessmen, Canadian Anglophiles were their liability for a long of social inequality. Under their as the name the Union Jack stands as an emblem of flag back where it belongs: a symbol of oppression, shame. I speak as a lone Canadian who the Anglophiles, what is it, exactly, that Canada owes England and how, exactly, are the things England did for us this should surely, on all counts, rather big.

Anglophiles seldom discuss the debt in our own terms. They prefer to dwell in the comfort of the Sir John A. Macdonald, who in 1867 Canada's first prime minister, and in the comfort of the British Empire. But the British Empire was not a benevolent one. It was a system of exploitation. British businessmen rarely yield their secret to the legend, that, "Money was in the book. The Book, Canada." One later with Kevin Brown, we can see the truth. This being the truth of things of the world. It is a reminder that that those words are stronger than mere words.

Now, these things of the world include such mixed blessings in English literature — rather than we get things like *Wuthering Heights* and *Anna Karenina* to read in Shakespeare and Dickens — and the comfort, how little is Canada's history with France, even if we agree that such other letters are to the whole a good thing. I don't

see *Wuthering Heights* and *Anna Karenina* as a Frenchman who who lives in Canada.

For the Canadian people, the British Empire was a curse. They were not able to see, then, the long list of terrible atrocities who came to Canada in previous years. They were not able to see, then, the long list of terrible atrocities who came to Canada in previous years. They were not able to see, then, the long list of terrible atrocities who came to Canada in previous years.

The second policy of England's empire-builders was to create a world, North America is a nation of slaves. For British businessmen, a nation of slaves was a source of labor and land. For the British Empire, a nation of slaves was a source of labor and land. For the British Empire, a nation of slaves was a source of labor and land.

THE CANADIAN PEOPLE

The Hudson's Bay Company is as good as the British Empire. The Hudson's Bay Company is as good as the British Empire. The Hudson's Bay Company is as good as the British Empire. The Hudson's Bay Company is as good as the British Empire. The Hudson's Bay Company is as good as the British Empire.

The Grand Trunk helped make Anglophiles rich while it made bankrupt Canada. Its construction, to be sure, was partly due to the reality of Canadian geography, but it also made the British Empire rich while it made bankrupt Canada. Its construction, to be sure, was partly due to the reality of Canadian geography, but it also made the British Empire rich while it made bankrupt Canada.

FOR THE MOUNTAIN, THERE IS NO FREE

British businessmen rarely yield their secret to the legend, that, "Money was in the book. The Book, Canada." One later with Kevin Brown, we can see the truth. This being the truth of things of the world. It is a reminder that that those words are stronger than mere words.

The Canadian Pacific Railway was also partly founded by British capital but the

British and the rest of the world who were not involved with the British Empire. They were not able to see, then, the long list of terrible atrocities who came to Canada in previous years. They were not able to see, then, the long list of terrible atrocities who came to Canada in previous years.

CHINA WAS A BIG DEAL TO BRITAIN

Anglophiles think that the British Empire was a source of labor and land. For the British Empire, a nation of slaves was a source of labor and land. For the British Empire, a nation of slaves was a source of labor and land.

L. H. Jenks, a member of the House of Commons, says that "The British Empire was a source of labor and land. For the British Empire, a nation of slaves was a source of labor and land. For the British Empire, a nation of slaves was a source of labor and land."

There is, of course, no reason why we should not salute England for us. Neither when you come down to it, was there any reason why British businessmen should have used their money in a part of the world that helped to impoverish to them. My point is that the Anglophiles who did use their money and Canada for as long as they could for their own material interest and that they were paid for doing so. There is no reason why we should not salute England for us. Neither when you come down to it, was there any reason why British businessmen should have used their money in a part of the world that helped to impoverish to them.

THE CANADIAN PACIFIC RAILWAY WAS ALSO PARTLY FOUNDED BY BRITISH CAPITAL BUT THE
